

CHRISTIAN GOLD HOUSE

Chapel Ministry Intl.

On 29th August 2015, Christian Gold Hose Chapel took up a bold and challenging community clean-up exercise starting from The L'Arche community, Lockerby Road in the Kensington and Fairfield areas, through Prescot Road to Liverpool City Centre where it crowned the event with distribution of leaflets. The event which marked the beginning of the celebration of its first Annual Anniversary in the community was a way of 'giving back' and contributing the community.

At Christian Gold House Chapel, we believe the importance of cleanliness in an individual as well as in communal life. Not only is it important for our human health and spiritual development, it is equally essential for environmental health. We therefore uphold the dire need to educate and sensitise individuals and communities about the importance of cleanliness in light of our faith. A clean environment, besides being a pleasure to live in, is a healthy environment. After all, cleanliness is next to Godliness, they say. (Bible verse in support of this please)

Effect of poor littering

Lack of hygiene provides places for disease-spreading 'agents' such as mosquitoes, flies, rats, cockroaches and mice which serve as hosts for transmitting diseases. It amounts to an open invitation to infectious diseases especially for children who can easily come in contact with such agents from playing in fields and costs the tax

payer more resources when local governments have to collect and dispose of excess rubbish.

For these reasons Christian Gold Hose Chapel is in consultation with communities, churches and other voluntary organisation to make the clean-up exercise an annual event across the city of Liverpool. For more information or to subscribe to this clean-up project please contact us at info@cghchapel.com if you wish to be part of this exciting approach for a healthy environment.
